

AI Use Declaration Form

Course: Introduction to Artificial Intelligence

Lab Title: Lab 3

Student Name: Samuel Asare Opong

Student ID: 01432028

GitHub Repository Link: <https://github.com/SamuelOpong07/lab-3.git>

Date Submitted: 28/07/2026

1. AI Use Summary

Question	Student Response
Did you use any AI tool for this lab?	Yes
Estimated percentage of the work influenced by AI	%10 - %15
Did you attach evidence of AI use where applicable?	Yes

2. Details of AI Use

Complete the table below for each AI tool used. Add more rows where necessary.

Name of AI Tool Used	Purpose for Using the Tool	Prompt or Instruction Given to the Tool	Part(s) of the Work Influenced by the Tool	How I Verified, Edited, or Improved the AI Output
Claude	To aid in the setup	"How do I do the lab setup?"	The setup	By comparing it with the instructions given by the lecturer
Claude	To aid in committing my work to Github	"How do I tackle the submission checklist"	The submission checklist	By comparing it with the instructions given by the lecturer

3. Attachment of AI Output Evidence

Where required, attach evidence of AI use. Tick all that apply. Add more rows where necessary.

Evidence Type	Attached ? (Yes, No, N/A)	File Name
---------------	---------------------------	-----------

		That error tells us two important things: 1. You're in the wrong folder. Your prompt shows <code>C:\Users\Samuel\Documents\AI</code> — this is a <i>parent</i> folder that's apparently its own git repo (probably one you made earlier for another course/lab). <code>lab-3</code> and <code>lab-2-predictive-analytics</code> are showing up as subfolders inside that repo, not as their own separate repos you're currently in. That's why git is treating them like "submodules" instead of just tracking your files normally. 2. Branch name mismatch. <code>error: src refspec main does not match any</code> means your local branch is called <code>master</code> (see the first line: <code>On branch master</code>), but you tried to push to <code>main</code>. Those need to match. Fix — step by step: First, navigate into the actual <code>lab-3</code> folder (not its parent): <pre>cd C:\Users\Samuel\Documents\AI\lab-3</pre> Then check you're in a proper git repo there: <pre>git status</pre>
Exported AI conversation	No	
AI-generated code snippet	No	

Revised version showing student input	No	
---------------------------------------	----	--

4. Student Declaration

I declare that:

Declaration Statement	Response (Yes/No)
The submitted work is my own work.	Yes
Any use of AI tools has been clearly declared in this form.	Yes
The prompts, instructions, and AI-generated outputs have been disclosed where applicable.	Yes
I reviewed, tested, edited, and improved any AI-generated content before submission.	Yes
My AI usage does not exceed 25% of the entire work.	Yes
I understand that undeclared or excessive AI use may be treated as academic misconduct.	Yes
